Table 1.0

**MLTX’s E10757 is used with**
- BT114-0 and BT114-1 Battery (7.2 Volt)
- BT115-0 and BT115-1 Battery (12 Volt)

**SLTX’s E10759 is used with**
- BT122-0 Battery (7.2 Volt)
- BT123-0 Battery (12 Volt)

**Pendant’s E10670 is used with**
- 10KP Battery
1) Warnings and Cautions

Warning, caution, and Note statements are used throughout this manual to emphasize important and critical information. You must read these statements to help ensure safety and to prevent product damage. The statements are defined below.

⚠️ WARNING

WARNING indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

⚠️ CAUTION

CAUTION indicates a potentially hazardous situation which, if not avoided, could result in minor or moderate injury. It may also be used to alert against unsafe practices.

NOTE: A note statement is used to notify users of installation, operation, programming, or maintenance information that is important, but not hazard-related.

3) MULTIPLE CHARGERS (Max. 3)

1. You can use up to three chargers with one power supply. Using more will damage the charger and/or power supply. This will also void the warranty.

2. Plug charger power supply adapter into 120 VAC 60 Hz power source. Plug the adapter jack in the charger base connection labeled “IN”.

3. In the charger that has the power supply adapter, plug the parallel cable (178-00203) in that charger base connection labeled “OUT”.

4. In the next charger, plug the other end of the parallel cable into the charge base connection labeled “IN”.

NOTE: The LEDs on the battery charger only light up with the connection of a battery pack.

Figure 4
3. Once in place, both LEDs will illuminate (RED and GREEN), indicating the battery is charging.

4. When the battery is fully charged, only the GREEN LED will be illuminated. The battery will be charged within 3 hours.

5. If an error has occurred with the charging process, the green LED will turn off and the RED LED will be illuminated. Remove the battery from the charger and try again (see Table 1.0 for more troubleshooting instructions).

**NOTE:** All new rechargeable battery packs must be charged before usage.

**Conditioning:** A new rechargeable battery pack may experience a low usable capacity during the first few charge cycles due to long storage. This is normal. Battery capacity will be restored after several full charge/discharge cycles.

---

**WARNING**

- This manual includes instructions regarding the safe operation of the Magnetek E10670/E10757/E10759 series of battery chargers. If you ignore these instructions you are assuming responsibility for damages, costs, or injury incurred by such disregard.

- These battery chargers contain no customer serviceable parts. Opening or tampering with the internal electronics will void the manufacturer’s warranty.

- Do not make any changes or modifications to the charger unit. Failure to comply will void the manufacturer’s warranty.

- Do not attempt to open a rechargeable battery pack. The pack has been permanently sealed at the factory and contains no serviceable parts. If the pack has been damaged in any way, immediately cease use of the battery pack and dispose of it in accordance with all applicable regulations.
2) Single Charger Instructions

1. Plug the provided power supply into the IN power jack as shown in Figure 1.

NOTE: The LEDs on the battery charger only light up with the connection of a battery pack.

Figure 1

2. Insert the battery into the slot until the battery settles at the bottom

NOTE: On chargers equipped with Velcro strap, use the Velcro strap to secure the battery to the charger to ensure a clean secure connection to the battery pack. See Figure 2 for illustration.

Figure 2

General Suggestions:

- For the longest battery life, rechargeable batteries should be recharged at least every 6 months, even when in storage.
- Recharging a battery only after it is fully discharged will prolong its life.
- Avoid recharging battery when fully or near fully charged.

Please familiarize yourself with these instructions before attempting to use.

Use of these devices is intended ONLY for BT114-0, BT114-1, BT115-0, BT115-1, BT122-0, BT123-0, and 10KP rechargeable batteries.

Do not attempt to charge alkaline or other non-rechargeable batteries.

Do not expose batteries to excessive heat or fire. Failure to do so could lead to an explosion and cause serious personal injury.

Do not charge batteries or operate the charger in a hazardous environment.

Do not short circuit battery or charger terminals.

Do not attempt to charge a damaged battery.

For indoor use only. The charger unit is not intended for outdoor use.

Keep the environment between 50-104º Fahrenheit (10-40º Celsius) during charging operations. Do not operate charger in direct sunlight or close to a heating source.

Do not store batteries in the charger.

Store batteries between 0-85º Fahrenheit (-20-30º Celsius)

Always dispose of used batteries in accordance with appropriate regulations.

Use only with approved Magnetek products. Not for use with other manufacturer’s products. Do not attempt to manually discharge battery packs.
